Professional Summary

Full Stack & Mobile Developer with professional experience delivering scalable **Android and iOS applications** using **React Native and Expo**, alongside web platforms built with **React.js, Django, and Ruby on Rails**. Experienced across the full project lifecycle, from **Electron desktop applications** to native mobile apps, with a track record of quickly understanding client requirements and delivering quality work under time pressure. Proven track record in agile teams participating in sprints, code reviews, and CI/CD workflows. Eager to contribute to a high-growth engineering environment solving real-world problems at scale.

Technical Skills

Mobile: React Native, Expo, GlueStack UI, Android Studio, iOS Deployment, Deep Linking, Push Notifications, Kotlin

Desktop: Electron

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material-UI, Tailwind CSS, Responsive Design

Backend: Django (Python), Ruby on Rails, REST APIs, PostgreSQL, SQLite

Languages: JavaScript, TypeScript, Python, Ruby, C/C++, SQL

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Xcode, Postman, SAP, Reactotron, AI tools

Concepts: OOP, Data Structures & Algorithms, Agile/Scrum, Full Stack Architecture, API Integration, Performance Optimization, Requirement Analysis, Team Coordination

Work Experience

Software Engineer (Full Stack & Mobile) | *Arkhitech, Lahore* Aug 2025 – Present

- Joined as Software Engineer on Aug 8, 2025 and was made a permanent employee on Oct 8, 2025, after demonstrating strong ownership across desktop and mobile codebases.
- Started on **Electron desktop applications**, fixing multiple bugs and shipping features such as Caller ID and PayLater for the Foodnerd and Howmuch POS systems.
- Transitioned to native mobile development using **React Native and Expo**, building AI chat functionality for the Foodnerd and HowMuch apps.
- Delivered bug fixes and UI enhancements across the **OrderTaker** and **Customer** mobile apps, and redesigned the complete Foodnerd.pk web application (React.js) to improve overall user experience.
- Since Apr 2026, building an AI-powered **"Perfect Pairing"** platform (drink and food pairing recommendations); completely rebuilt the **Rider Delivery App** and built a new **Caller ID** React Native application; continued supporting native apps with Expo updates and UI enhancements.
- Contributed to full-stack feature development using **React.js** on the frontend and **Ruby on Rails** on the backend, including RESTful API design and consumption.
- Participated in agile sprints contributing to planning, estimation, code reviews, RSpec testing, and CI/CD deployment workflows.

Frontend Developer | *Fruitful, Remote* Nov 2025 – Apr 2026

- Led frontend delivery on the client project, taking ownership of redesigning the website and implementing new features end-to-end.
- Resolved outstanding issues and bugs throughout the engagement while ensuring on-time delivery.

ERP & MIS Intern | *Loftex Limited, Lahore* Aug 2024 – Nov 2024

- Enhanced ERP modules and optimized internal business workflows to reduce manual processing overhead.
- Developed and debugged **SAP ABAP** programs supporting core manufacturing operations.
- Supported ERP integration and end-to-end data flow management across departments.

Education

Bachelor of Science in Computer Science | *University of Central Punjab, Lahore* Nov 2021 – Jul 2025

GPA: 3.5 / 4.00

Data Structures & Algorithms, OOP, Databases, Operating Systems, Machine Learning, Computer Networks, Information Security, Natural language processing, Data Science, Mobile App Development

Personal Projects

AI Video Interview System (AI-VIS) | *React.js · Django · Python* 2023 – 2025

- Built an end-to-end AI-powered recruitment platform with **React.js** frontend and **Django** REST backend.
- Integrated facial emotion detection, voice sentiment analysis, and **LLM-based dynamic question generation** tailored to job roles.
- Designed role-based dashboards (Admin, HR, Candidate) with granular access control and full speech-to-text/text-to-speech interview flow.
- Reduced hiring bias by **40%** and HR screening workload by **30%** in internal testing.

DNT network | *Next.js · Node* 2026

- Developed a responsive, premium web platform using Next.js, TypeScript and Tailwind CSS for a B2B FMCG distribution company, utilizing Framer Motion to build highly polished micro-interactions and smooth user experience transitions.
- Architected clean, modular React component structures to effectively showcase complex business models, regional distribution metrics, and logistics networks to potential brand partners.

Moon's Burger Premium Food Delivery & Management Web App | *Next.js · Node* 2026

- Web & Mobile Apps: Built a responsive Next.js 14 web app and a native React Native (Expo) mobile app featuring React Native Maps integration.
- Backend & Payments: Developed a high-performance FastAPI backend with secure Stripe payment processing and asynchronous queues via Redis and Celery.
- Admin & Infrastructure: Created an admin portal for order tracking, containerizing the entire ecosystem with Docker Compose and Nginx.

The Core Montessori Portal (School Management System) | *React.js · PHP · MySQL* 2025

- Engineered a full-stack portal using PHP and MySQL to automate student lifecycle tracking, fee collection, and staff payroll.
- Developed modules for grade reporting and syllabus tracking, integrating an SMS gateway for real-time parent-teacher notifications.

Full Stack Service Company Web Application | *React.js · Django · PostgreSQL* 2024

- Developed a full-stack responsive web application with a React.js frontend and Django backend.
- Designed PostgreSQL database schemas and exposed REST API endpoints consumed by the React client.
- Built dynamic service listings, admin management panel, and integrated contact/booking forms.

Music Sharing App | *Android · Kotlin* 2023

- Built an Android application enabling music upload, browsing, and real-time streaming with intuitive UI and user library management.

Certifications

Introduction to Generative AI | *Google* 2026

Agents and Workflows | *OpenAI* 2026

Applied AI Foundations | *OpenAI* 2026

AI Foundations | *OpenAI* 2026

Certified Cloud Applied Generative AI Engineer | *PIAIC* 2025
